

What is claimed is:

1. Convertible top for attachment to a roof part of a motor vehicle, comprising:
a fabric material,
at least one mounting element attached to the fabric material, the at least one mounting element being constructed for detachable connection to at least one corresponding mounting element of the roof part in an installed state of the convertible top.
2. Convertible top as claimed in claim 1, wherein the convertible top is a folding convertible top.
3. Convertible top as claimed in claim 1, wherein the mounting element which is attached to the material of the convertible top is a flat element.
4. Convertible top as claimed in claim 3, wherein the flat element is comb-shaped.
5. Convertible top as claimed in claim 3, wherein the mounting element has clips with openings in which the corresponding mounting element of the roof part is engageable.
6. Convertible top as claimed in claim 1, wherein the roof part has at least one recess for passage and accommodation of the mounting element.
7. Convertible top as claimed in claim 1, wherein the corresponding mounting element of the roof part has a catch element for detachable connection to the mounting element.
8. Convertible top as claimed in claim 1, wherein the fabric material covers a projection of the roof part when attached to the roof part.
9. Convertible top as claimed in claim 1, wherein the mounting element is sewn to said fabric material.

10. Convertible top as claimed in claim 1, wherein the mounting element has been cemented or thermally bonded to the fabric material of the convertible top.

11. Roof module of a motor vehicle with a convertible top of a motor vehicle, comprising:

a fabric material,

a roof part,

at least one mounting element attached to the fabric material, the at least one mounting element being detachably connected to at least one corresponding mounting element of the roof part.

12. Roof module as claimed in claim 11, wherein the convertible top is a folding convertible top.

13. Convertible top as claimed in claim 11, wherein the mounting element which is attached to the material of the convertible top is a flat element.

14. Convertible top as claimed in claim 13, wherein the flat element is comb-shaped.

15. Convertible top as claimed in claim 13, wherein the mounting element has clips with openings in which the corresponding mounting element of the roof part is engageable.

16. Convertible top as claimed in claim 11, wherein the roof part has at least one recess for passage and accommodation of the mounting element.

17. Convertible top as claimed in claim 11, wherein the corresponding mounting element of the roof part has a catch element for detachable connection to the mounting element.

18. Convertible top as claimed in claim 11, wherein the fabric material covers a projection of the roof part.

- 19. Convertible top as claimed in claim 11, wherein the mounting element is sewn to said fabric material.

- 20. Convertible top as claimed in claim 11, wherein the mounting element has been cemented or thermally bonded to the fabric material of the convertible top.
